Introduction

Welcome, Gem Hunter!

Your journey begins now. As a brave and curious adventurer, you've set out to uncover the world's most precious gemstones hidden in ancient ruins, treacherous caves, and mystical lands. Use your skills, wit, and courage to collect rare gems and unlock the secrets they hold.

Let the hunt begin!

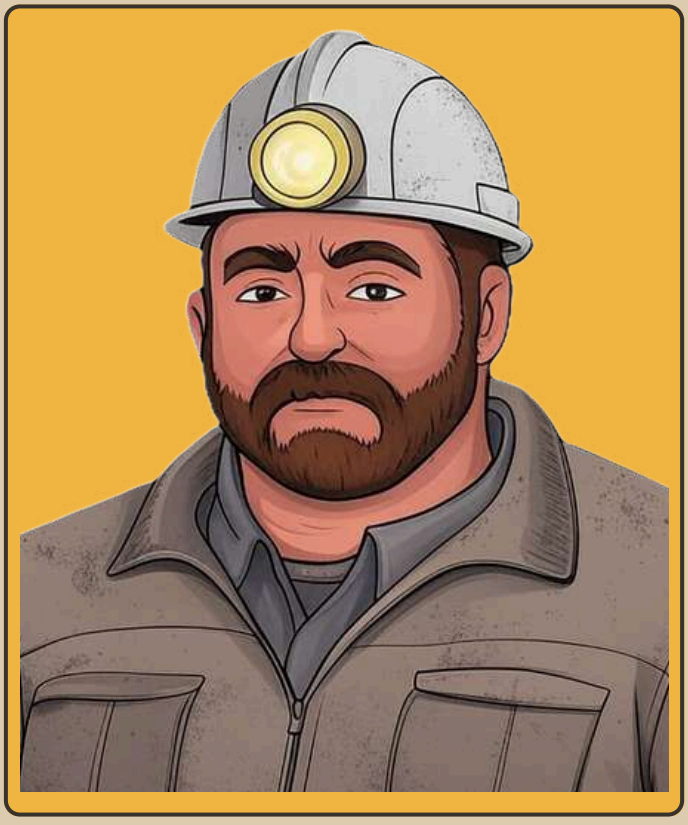

Characters

- ***Meet the Gem Hunters :***

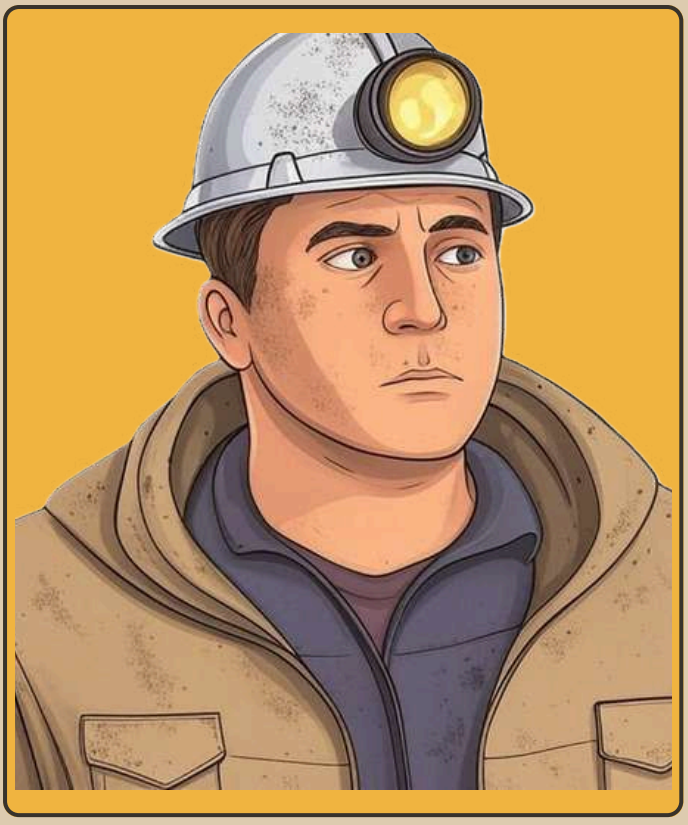

Marie - Calm, clever, and resourceful, Marie is the strategist. She sees the bigger picture and always has a plan. If you're in a bind, you'll be glad she's by your side.

Bob – The muscle of the team. With his trusty pickaxe and unshakable confidence, Bob charges into danger headfirst. He's not the fastest, but when something needs smashing, he's your guy.

Sally – Sharp-eyed and quick-witted, Sally always spots the gem before anyone else. Her speed and agility make her perfect for darting through traps and tricky terrains.

Joe – The wildcard. Joe's lucky streak is legendary—and unpredictable. Whether it's finding a hidden stash or narrowly escaping disaster, Joe turns the odds in his favor (most of the time).

Before entering the mine

To begin your quest, start the game on your computer after downloading it or play on our website.
The title screen shown on the right will be displayed, followed by the game introduction. Press any key on your keyboard to display the connexion screen.

Connexion to the game

If you already created an account, just enter your ***username*** and ***password***. Once your details are correct, click "*Connect*" to enter the game and start your adventure with other players!

If you have not created an account yet, please refer to the section '*Create an account*'.

Create an account

If it’s your first time on Gems Hunt, you have to create an account before joining a game.

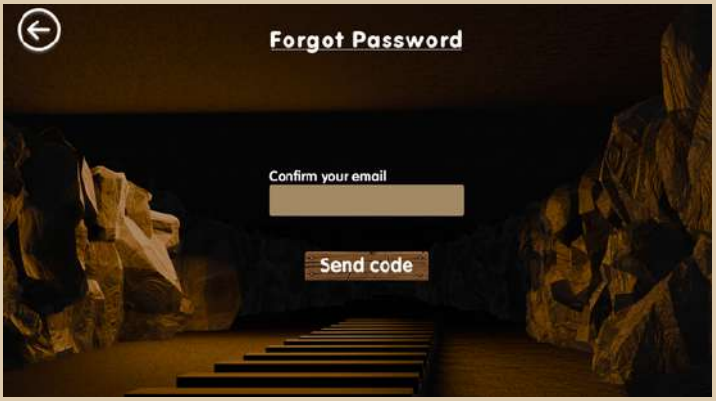

Click on ‘create an account’, you will arrive to the account creation screen. Enter your username, email, and password, then confirm your details.

Forgot your password

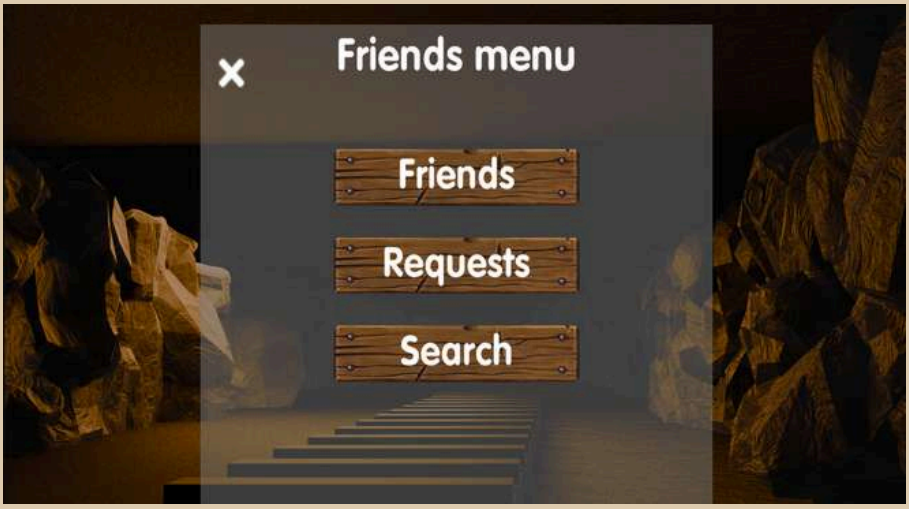

No problem! On the connexion screen, click "Forgot Password" and enter the email address linked to your account.

We’ll send you a password reset code. Follow the instructions in the email to create a new password and get back to the game.

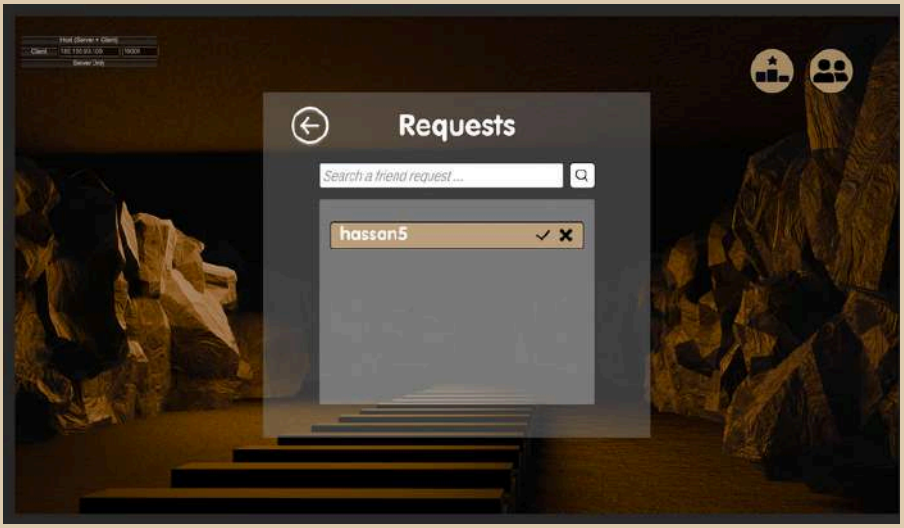

Manage your friends

The **Friends menu** allows you to easily manage your in-game social connections. From here, you can view your current list of friends, check incoming friend requests, and search for specific players to send them a friend request.

Screenshot of the friends menu with the different sections to manage them and see or send friend requests.

Example of a friend request that you can accept or deny

Join a game

When connected, you have the possibility to **join** or **create** a game.

If you want to create a room, you can create a public or a private one. Note that private ones can only be joined with a code.

If you want to play, join a game with a code or click on random. It will teleport you in a public game.

If you successfully joined a game, you will arrive in a lobby like in the picture just above.

In the lobby

Once you have entered a lobby, you will have to wait other players to launch a game. The limit is *2 players minimum* to start a game.

During this waiting time, you can do several things to prepare your hunt.

Skin panel

At the bottom left of the screen, you will find a button named **skin**. As indicated by its name, it will display a panel to change the skin of your character.

Change your color among 8 available and choose a hat to create to show your style and impress other players.

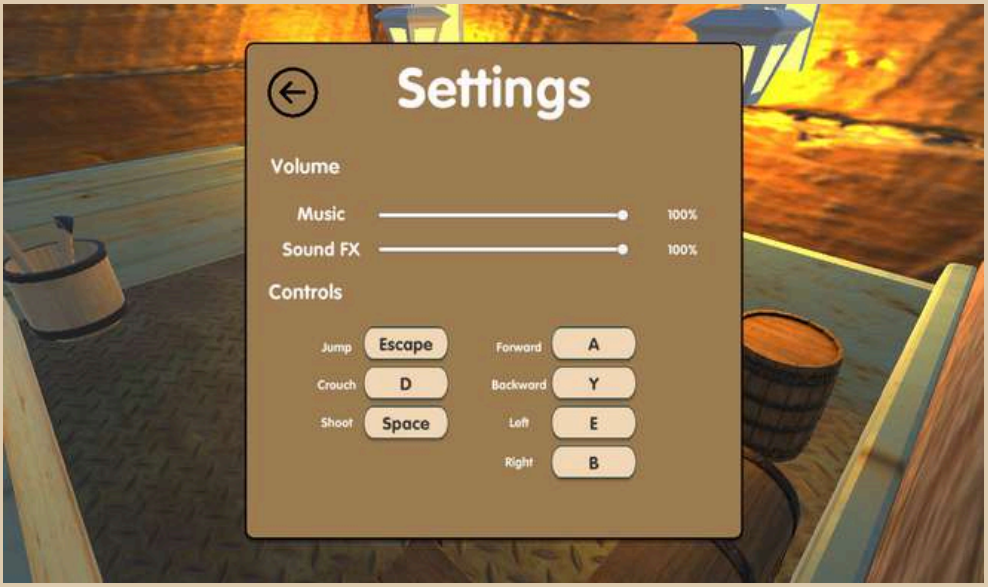

Settings panel

At the top left of the screen, you will find the **setting button**. Click on it and it will display the specific panel.

In this panel, you will be able to *customize your controls* for every possible action in the game : just click on the current control and enter the hotkey you want to assign.

You can also *adjust audio settings* for music and sound effects at your ease. You can even cut them off if you want to put your own music while playing the game.

Screenshot of the settings panel where you can customize your controls and adjust audio settings

Quit the lobby

If you wish to exit a game lobby, you can press the “**Quit Game**” button on the top left corner.

To prevent accidental exits, a confirmation panel will appear asking if you're sure you want to leave. Confirm your choice to exit the lobby, or cancel to stay and continue preparing with your team.

Screenshot of the confirmation panel asking if you really want to leave the lobby

Controls

General controls :

Mouse

Move your mouse to look around and search the gems.

Left Click

Left click to shoot with your weapon.

The following list of commands (Azerty keyboard reference) is the default when you launch the game. Note that you can customize your controls (refer to the corresponding section in 'In the lobby' chapter)

Specific controls :

Jump : Space bar

Press the space key to jump with your character and avoid various obstacles on your way

The controls - Part 2

Using the keyboard - Part 2

Crouch : C

Press the C key to crouch with your character and avoid obstacles on the track

Forward : Z

Press the Z key to go forward with your character

Backward : S

Press the S key to go backward with your character

The controls - Part 3

Using the keyboard - Part 3

Left : Q

Press the Q key to go on the left with your character

Right : D

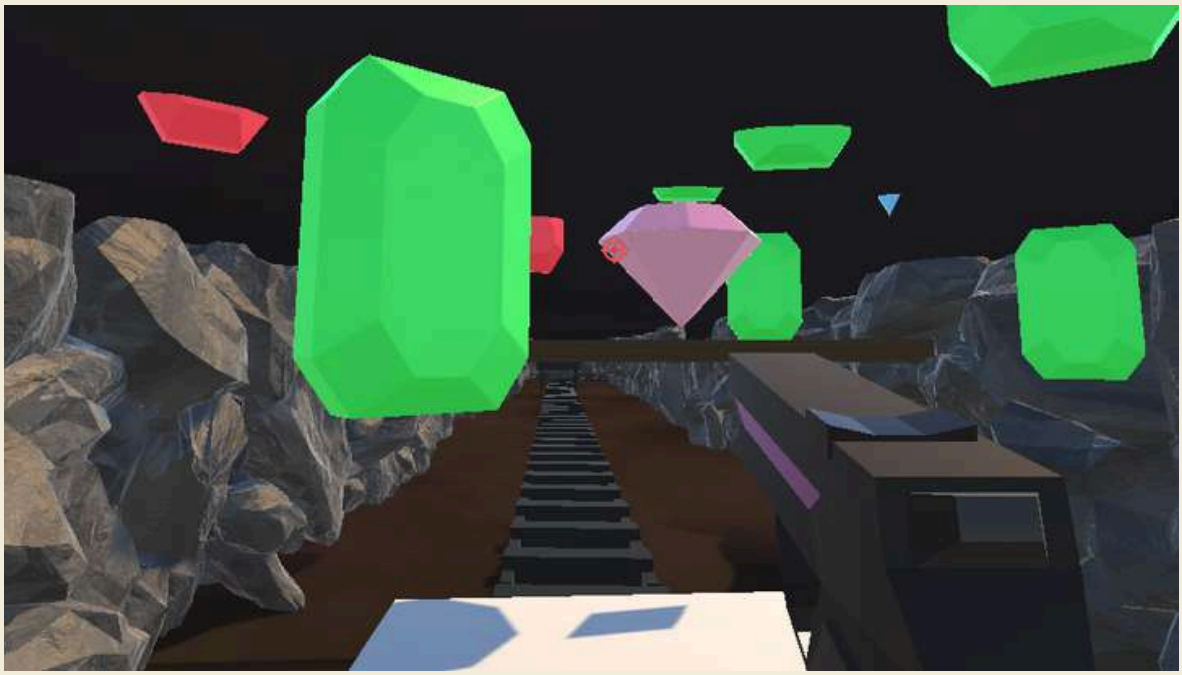

Press the D key to go on the right with your character

How to play a game

Your objective :

Collect as many points as possible by shooting on different gemstones. However, be careful of enemies you might encounter on your way.

Be careful during your hunt! If you are hit by a bat or a wood beam, you will be stunned and won't be able to shoot during a short period of time. So, be on your guard to collect the maximum points!

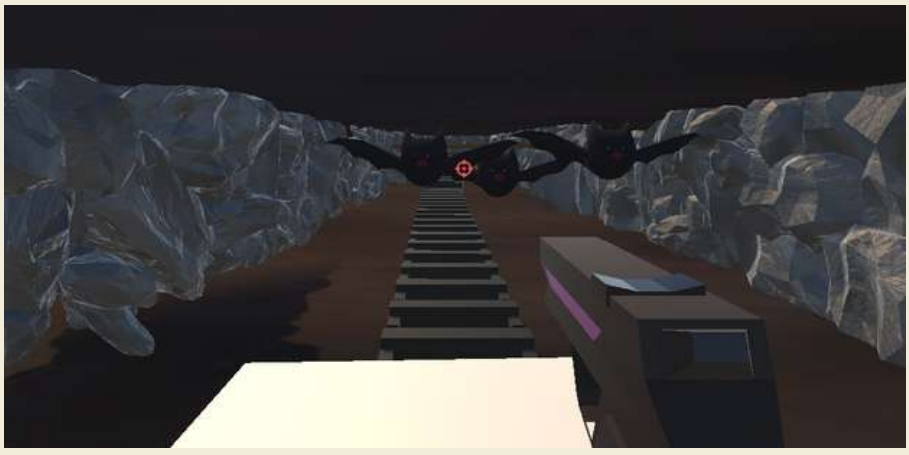

Enemies and obstacles :

- 🦇 **Bats**

Fast and sneaky, these creatures fly in group and will try to block your view. Don’t let them distract you or you will end up paralysed during a short period of time!

- **Wood Beam**

An old mine is full of wooden beams, some might be on your way. Crouch or jump to avoid them. Otherwise you will end up stunned.

Swarm of bats in front of the player

How to play a game - Part 3

The gemstones

Gemstone types :

- 💎 **Diamond (100 points)**

The hardest gem to crack literally! Shoot the diamond to earn a lot of points or try to make a comeback in the game.

- 🔴 **Ruby (50 points)**

Fiery and bold, the ruby glows with intense red energy. It’s the second rarest gemstone in the mine.

- 🔵 **Sapphire (30 points)**

Cool and mysterious, the sapphire shines with deep blue. Sharpen your aim and collect its points before someone does it!

- 💚 **Emerald (10 points)**

Vibrant and rare, the emeralds are the most common stones you’ll find. Hit it fast before it disappears into the shadows!

Start your adventure

With the knowledge you have gained so far, you are ready to start your mission.

But if you still have doubts, read this message for future adventurers: it was written by a legendary one who once braved the seas. Listen carefully :

" Passion and dreams are like time... Nothing can stop them and it will be so as long as there are men to give a meaning to the word freedom!"

So start your adventure now and join :
